

VISCO JET

CONTAINER AND DRUM AGITATORS

Trendsetting agitator technology

Homogenize, suspend, disperse

VISCO JET® agitator systems

AGITATE SLOWLY – WITH FAST RESULTS

For successful agitation, it's the technique that matters, not the speed. VISCO JET® agitators prove this in no uncertain terms. Their particular strength lies in the special geometry of the conical mixing elements: with its cleverly-designed spatial and angular relationships, the agitator ensures an optimum mixing process in a very short time, even at the lowest circumferential speeds.

VISCO JET® agitator technology sets standards and proves itself in a very wide range of industries around the world. It is flexible, reduces costs and guarantees high-quality results.

VJ350

THE BESTSELLER

Container attachment agitator

- For IBC containers with openings from 150 mm
- Special VISCO JET® „Tornado“ mixing element with an effective diameter of 650 mm
- With stainless steel cross beam and lift pockets or aluminium cross beam
- Drives with 1.1 / 1.5 / 2.2 / 3.0 kW available (380V, also 230V in some cases)
- Individual speed control for all mixing tasks
- Different VISCO JET® mixing elements for low, medium and high-viscosity media
- Customised to suit your specific requirements
- Version for foodstuffs available
- Available as ATEX version with 1.85 kW drive 
- Programming and readout unit
- Speed control based on fill level
- Lifting fixture

VJ300

Container screw-on agitator

- For direct screw mounting on IBC containers
- Special VISCO JET® „Expander“ mixing element with an effective diameter of 300 mm for mixing low-viscosity products
- Drive with 0.37 kW
- Version for foodstuffs also available
- Available as ATEX version 

VISCO JET

● Features and performance

○ Upgrade options

VJ370 | VJ380

VJ370

VJ380

The specialists for drums

- VJ370 for closed drums (2" bung hole) with VISCO JET® „Mistral“ mixing element and angled stainless steel cross beam
- VJ380 for open drums with VISCO JET® mixing element and flat stainless steel cross beam
- Drive with 0.37 kW
- Available as ATEX version 
- Lifting bracket for easy disassembly

VJ520

For transport containers – securely bolted and yet flexible

- For stainless steel transport containers with covers
- Agitator firmly bolted to the cover
- Different VISCO JET® mixing elements for low, medium and high-viscosity media
- Customised to suit your specific requirements
- Various drives available
- Available as ATEX version 
- Lifting bracket for easy hoisting with lifting gear

VISCO JET® agitator systems

CAUSE...

Accelerated laminar flows and the reverse turbulence created by dynamic pressure interact at the cone entrance as the agitator rotates, generating the high-momentum mixing movements so typical of VISCO JET® technology.

...AND EFFECT

Extremely material-friendly and highly efficient agitator processes with very little energy expenditure are now possible. This applies particularly to tanks with very high volumes.

Have you found the right mixing element?
